

Global Centers of Excellence Readmission Rates are 65% Lower Than U.S. Benchmarks Across a Broad Range of Procedures.

Summary

Patients in the US and globally face barriers to accessing top-quality providers. Employers that care deeply about their workforce don't want geography, affordability, or the difficulty of navigating medical systems to get in the way of life-changing or life-saving care. World Class Health has coordinated over 3,500 treatments with its Global Concierge Health Services, a solution comprised of a Global Excellence Network, Care Navigation, and Travel Concierge Services. At its Global Centers of Excellences, World Class Health has been dedicated to delivering the best clinical outcomes by covering a broad range of surgeries, including orthopedic, bariatric, cardiac, gastrointestinal, gynecologic, and neurosurgical procedures.

Methodology

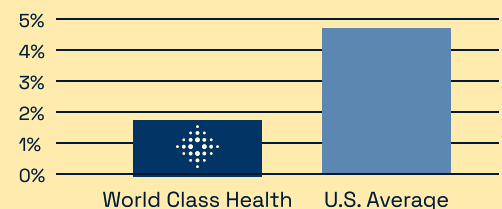

World Class Health clinicians conducted a retrospective analysis of over 500 recent procedures (255 orthopedic, 131 bariatric, 8 cardiac, 36 gastrointestinal, 44 gynecological, 35 neurosurgical [including spine]) and compared observed readmission rates to U.S. averages.^{1,2,3,4,5,6}
